Kelheim (Bavaria): Overview 1934
(Source: testimon photo collection)

By actively collecting historic original copies and taking pictures ourselves we have accumulated an archive of more than 15,000 photographs of which we own the copyright. Most of them are paper copies since 1918 with the bulk from the years after 1955 depicting buildings and landscapes.

The following list makes accessible the majority of the motives by place and year except those from our focal towns Munich, Nuremberg and Fürth because of their volume they would have to be differentiated in a way which this simple spreadsheet does not allow.

Though this ever growing collection is primarily intended to serve our own needs for visual material we are willing to provide photos from it also to others. Just contact us and we will try to help.
